luzr wrote on Wed, 12 March 2008 09:15Anyway, rest should be now fixed.

Mirek

I've checked SVN rev. 187 and found several problems.

1) uppsrc/Updater still has problems.
2) uppsrc/plugin/png/pngreg.icpp seems to be included twice somewhere, and it needs to be guarded.
3) uppsrc/ide/Builders/init is still not under VCS.
