forlano wrote on Mon, 24 March 2008 19:01I went on the mingw site and downloaded their installer. Then I choose a candidate version to install in c:\upp\mingw.
I compiled and everything was ok but my app from 3.4 mb is now 3.8. The previous upp I used was a 2007.12. I do not know if my app became bigger because of the new 2008 version or due to the new compiler (5.1.3)

Luigi

IMO, you have just witnessed that "uld" is more than just faster
