Oh, great. Looks like GetTextSize does not work with CJK:

```
void MyApp::Paint(Draw& w)
{
    w.DrawRect(GetSize(), SWhite);

    Size sz = GetTextSize(txt, Arial(30));
    w.DrawRect(100, 100, sz.cx, sz.cy, LtGray());
    w.DrawText(100, 100, txt, Arial(30));
}
```

```
GUI_APP_MAIN
{
    SetDefaultCharset(CHARSET_UTF8);
    MyApp().Run();
}
```

I was going down and it finally turned out that "GetCharWidthABC" does not return correct sizes for whatever reason. Just great...

(in void FontInfo::Data::GetMetrics(int page, CharMetrics *t))
