Subject: [Bug] Windows UI Refresh Missed.
Posted by huanghuan on Wed, 26 Mar 2008 12:48:04 GMT

When a commmon window(such as a notepad.exe) move over the upp window slowly, the upp window refresh mess the show part, missing some.

In this image the head photo is a ImageCtrl, and the Background is a StaticRect.
OS is Win XP.
I found the only classical XP theme can make these happen.
