huanghuan wrote on Wed, 26 March 2008 08:48 When a common window (such as a notepad.exe) move over the upp window slowly, the upp window refresh mess the show part, missing some.

In this image the head photo is a ImageCtrl, and the Background is a StaticRect.
OS is Win XP.

I found the only classical XP theme can make these happen.

This is very strange, never seen this.

Post a testcase and details (what U++, what OS).
