Subject: Re: Missing API for what I need to do? Posted by zsolt on Thu, 27 Mar 2008 21:10:56 GMT View Forum Message <> Reply to Message

I was unable to use IsVisible()...

It would be very useful in some cases to be able to identify the control sitting in a tab.

I would add a line to the public interface of TabCtrl::Item class:

Ctrl\* GetCtrl() { return slave; }

Are there any barriers to do this?
