abarilla wrote on Tue, 07 March 2006 10:07Here's the code for the GetRowsProcessed function for sqlite.

```
int Sqlite3Connection::GetRowsProcessed() const {
    LOG("GetRowsProcessed()");
    return sqlite3_changes(db);
}
```

Wow, thanks! (If I remember well, we were not able to find that in Sqlite manual).
