abarilla wrote on Tue, 07 March 2006 10:07 Here's the code for the GetRowsProcessed function for sqlite.

```
int Sqlite3Connection::GetRowsProcessed() const {  
    LOG("GetRowsProcessed()");  
    return sqlite3_changes(db);  
}
```

Wow, thanks! (If I remember well, we were not able to find that in Sqlite manual).
