Hi,

Found a bug in 2008.1beta2:CtrlLib/FileSel.cpp line 1024 causing Desktop entry with international characters in path to be incorrectly shown on directory listing. Please apply the following fix adding FromSystemCharset(..) to the existing line of code:

```
dir.Add(FromSystemCharset(GetWinRegString("Desktop",  
"Software\\Microsoft\\Windows\\CurrentVersion\\Explorer\\Shell Folders",  
HKEY_CURRENT_USER)));
```

// Tom
