I got a bit surprised from the case sensitivity too, I'm checking the String.h and I see, that except defining stricmp and strnicmp even on POSIX/WINCE platform, there's no other support in U++ for those things.

It feels somewhat awkward to see thing like "if(path.Find(".jpg") || path.Find(".JPG"))" (and I don't mean the hidden bug this time, but the duplicity of "jpg" text).

Well, I would write it as

```
if(GetFileExt(ToUpper(path)) == ".JPG")
```
