Hm I would not worry so hard. It is what config flags are for, after all..

Anyway, back to the plan. I guess uppsrc nest root is as good place to put uppconfig.h as any other Could you try that this idea works in practice please?

Mirek

Bombs GUI ...

Linking...
/usr/bin/ld: cannot find -lgtk-x11-2.0
collect2: ld returned 1 exit status

I'd like to say that defining flagNOGTK in Core.h didn't help.

Linking is still broken.

Adding "NOGTK GUI" configuration to all project files still seems to be the easiest solution.
