cdoty wrote on Wed, 23 April 2008 16:57 Under Windows, GetHWND() always returns NULL. How can I get the HWND of a control?

I've tried to get the handle during the control constructor, during a Paint, and during the constructor for the App.

You can't. Ctrls do not have HWND

Only top-level Ctrls have one or DHCtrl derived widgets (like GLCtrl).
