Subject: Re: SVN UPDATE & .deb BUILD : Revision 217 - 2008-04-23
Posted by bytefield on Fri, 25 Apr 2008 10:22:24 GMT

The executable name is theide-svn, like in other upp debian builds.
Main installation directory is /usr/share/upp-svn and after running theIDE, user installation
directory is /home/<user>/upp-svn and theIDE configuration directory is
/home/<user>/.upp/theide-svn.
I guess it behave like your builds.
Is something wrong?
