Hi,

i don't want to offend anyone but icq site is a mess. After few minutes that i spent with icq, I've decided to remove my account and guess what, you cannot remove your account directly from the site (I don't know if that's possible from their programs, because i haven't installed Windows OS on my box).

So, you others programmers, how do you communicate each others, especially u++ core programmers (icq, mail, chat, YM, forum, etc.)?
