Subject: Crash when using Microsoft's Virtual Desktop Manager [BUG] Posted by Justin on Wed, 08 Mar 2006 23:53:20 GMT View Forum Message <> Reply to Message

I love to use Virtual Desktop Managers for increased productivity. As of now, the free Microsoft Virtual Desktop Manager is having problems with theIDE. If I switch to a different desktop while running theIDE, the main window does not repaint itself when I return to the Desktop with theIDE in it. I have to close out of the program and reopen it for everything to work properly.

602Beta4 Windows XP SP2
