Hi,

Your package works fine but in my application, i use at least 3 packages, main application which uses DBConnector package and MySQLConnector package.

I seems thats "packaged" version doesn't works. I join a version of a test application that don't work.

This application uses the packages below:

- * DBConnector package
- * MySQLConnector package
- * SQLTest package

Can you tell me why this package don't works?

Thanks,

Lucas
