Update on uvs2 versions :

uppsrc - 2531

reference - 112

examples - 140

tutorial - 38

As a solution for Ubuntu hardy bug, which turned out to be a compiler bug, the default optimization for release build has be changed adding -fno-inline-functions.

NOTE : If you build from svn source, please change build optimization accordingly; not doing so theide will crash.

Do so in SETUP-BUILD METHODS-OPTIMIZE FOR SPEED line, adding at end
-fno-inline-functions

BYTEFIELD, please change your optimization too BEFORE building 32 bit package.

Debian 64 bit build available here :

http://www.ultimatepp.org/svnbuilds/upp-svn_SVN.224_amd64.de b

Debian 32 bit build available here :

http://www.ultimatepp.org/svnbuilds/upp-svn_SVN.224_i386.deb

Please test both to see if bug is completely gone !

Ciao

Max
