Subject: Re: Why ReadWithBarrier returns bool (current svn) Posted by mirek on Tue, 06 May 2008 19:25:07 GMT View Forum Message <> Reply to Message

hans wrote on Tue, 06 May 2008 14:31Hi, we have

```
template <class U>
inline bool ReadWithBarrier(const volatile U& b)
{
  volatile bool tmp = b;
  ReadMemoryBarrier();
  return tmp;
}
```

but use it as it would return an int too, like in

inline int AtomicRead(const volatile Atomic& t) { return ReadWithBarrier(t); }

So I would suggest to replace in ReadWithBarrier the bool with the U template parameter (in tmp var and return type).

Cheers, Hans.

Yes, already done. You caught us in the process

BTW, final version removes second volatile too -> leads to more optimal but still correct code on both GCC and MSC (7.1, 8, 9).
