That the output is mixed (normal output from the app and valgrind output). Same as with gdb.

Options below could be useful ...

```
--log-fd=<number>       log messages to file descriptor [2=stderr]
--log-file=<file>       log messages to <file>
--xml=yes               all output is in XML (some tools only)
```
