File 'Valgrind.cpp' uses a wrong (or not compatible with default ubuntu Valgrind version) flag  
calling valgrind executable.  
The line 20, which is :

```
cmdline << "valgrind --xml=yes --num-callers=40 --log-file-exactly=" << fn << ' ';
```

Should be :

```
cmdline << "valgrind --xml=yes --num-callers=40 --log-file=" << fn << ' ';
```

Ops. This will not work with my copy of valgrind. "--log-file" produces non-fixed filenames there...  
(valgrind appends process number to extension - that is why it has -exactly option....)

Mirek

Uhhmm... that's weird. From where did you download valgrind ? I've got the latest ubuntu  
package and it doesn't have "exactly" stuff.

BTW, I think I can patch valgrind.cpp to check wether the option is available or not.... should I ?
