---

```
Index<String> Ide::PackageConfig(const Workspace& wspc, int package,
                                const VectorMap<String, String>& bm, String mainparam,
                                Host& host, Builder& b, String *target)
```

(ide/Build.cpp the start of file)

...and the rest is in builder...

Mirek
