Subject: Re: Can Ultimate++ support Digital Mars Compiler? Posted by Mindtraveller on Sat, 17 May 2008 16:18:54 GMT View Forum Message <> Reply to Message

Could you please add \*experimental\* support for Digital mars compiler builder within TheIDE? For now it doesn`t compile U++, but DM C++ itself is good. TheIDE and DMC++ compiler is great solution i.e. for programming embedded systems which are DOS16-compatible binaries.
