
Subject: How to create a GridCtrl with fixed cell size

Hi!

I need something like a vertical multirow list. So I thought about using a GridCtrl.

I need a fixed cell size and the column count must adjust itself depending on the size of the control. I have attached a test package that shows how I tried to do this. The problem is that after I resize the window, the width of the columns gets lost somehow. Is there a better way to do this?

Thanks,
Raul
