## Subject: How to create a GridCtrl with fixed cell size Posted by copporter on Mon, 19 May 2008 10:07:18 GMT

Hi!

I need something like a vertical multirow list. So I thought about using a GridCtrl.

I need a fixed cell size and the column count must adjust itself depending on the size of the control. I have attached a test package that shows how I tried to do this. The problem is that after I resize the window, the width of the columns gets lost somehow. Is there a better way to do this?

Thanks, Raul
