Subject: Wp64 command line option not needed

Hi,

the command line option Wp64 is not needed on 64 bit Windows with MSC compiler as it is automatically enabled on Win64. Also it gives hundreds of warnings if used:

cl : Command line warning D9035 : option 'Wp64' has been deprecated and will be removed in a future release

This option is set in ide/Builders/MscBuilder.cpp on line 79.

I think this option should be removed from there.
