Hi,

the command line option Wp64 is not needed on 64 bit Windows with MSC compiler as it is automatically enabled on Win64. Also it gives hundreds of warnings if used:

cl : Command line warning D9035 : option 'Wp64' has been deprecated and will be removed in a future release

This option is set in ide/Builders/MscBuilder.cpp on line 79.

I think this option should be removed from there.
