luzr wrote on Thu, 09 March 2006 15:16Visual C++ 2005 (=MSC8) is available for free now (it might end in autumn).

Cool. I will try and find this.

Quote:

Errors you posted indicate that MSC71 is wrongly setup - most likely missing path to executable in build method. Could be even bug in autosetup, what MSC71 version are you using?

Mirek

I am using 1.01.

Everything else works fine, just not anything dealing with MySQL.
