luzr wrote on Tue, 27 May 2008 01:19 You are linking with static libraries, which is a no-no for Linux GUI apps.

Activate "Use shared libraries" instead in the output mode.

BTW, have you switched it yourself or it is badly set in after installing .deb?

Mirek

The same problem as with me. In my case setting of "Shared libraries" in GUI or "bm" file doesn't help.
