Hi,

I am new to this forum and Ultimate++.

Unfortunately, Thelde reports an error saying that the compiler cannot find the bits/atomicity.h header file, when trying to run one of the sample programs.

I am using the 2007 version of UPP and it used to compile successfully under Ubuntu 7.10 (Gutsy), but after upgrading to Ubuntu 8.04 (Hardy Heron), it cannot find this particular file. I tried to re-install it and also installed the build-essential package.

Same problem as the OP, it seems.

Any solutions?

Thank you,
Michel

edit:

Comiler says:

/home/michel/m/cpp/ultimate/uppsrc/Core/Core.h:303:28: error: bits/atomicity.h: No such file or directory
