kodos wrote on Fri, 06 June 2008 09:38I have implemented my tabs with TabBar now and everything works great. The only feature that I'm missing is a possibility to have "fix" tabs that can't be closed. But currently I simply emulate this with a overridden ContextMenu method

Quick bugfix for TabBar: The method SetDisplay in TabBar.h is missing a return statement. Fix (frozen) tabs will be implemented. Right now I'm working of better grouping and switching between files with similar names but different extensions.
