Paco wrote on Fri, 06 June 2008 07:34Hi Mirek
U++ is a marvellous C++ piece of code
I am programming in C++ since 2 years migrating from Visual Basic and I am tryng to migrate my
consult software (home VB brew) to C++ so i am totally new with U++
Reading every example and docementation about MySQL I am not able to compile any code to
link MySQL
Added MySQL, Sql & SqlCtrl to ACOMAR(my package), paths with setup are correct but still
errors, first of all is MySql.cpp -> MySql.h: No such file or directory.....
Is out there any easy guide to link with MySQL beginning from zero?
Thank you very much

There is no easy guide yet.

Please, post errors

Mirek
