Subject: Upp's Support and Project Leadership

This is more of a curious question rather than anything else. Mirek, you seem like you work on Upp almost full-time, always responding to questions and constantly making improvements and patching quickly. I think it is awesome and it is what keeps the project going. Having a project leader that is very accessible and communicating with the community is one of my reasons for sticking around and using Upp in my work instead of something else like QT (that is besides the technical reasons b/c I think Upp is much better). My question is, how is the project funded? Does it have some sort of corporate sponsor who you work for? What is your background?

Sorry if it seems personal, but like I said, just appreciative and curious.
