mrjt wrote on Thu, 12 June 2008 17:35 I'll contribute some documenting once you guys have figured out how it's going to work

My only suggestion is that instead of just saying 'submit some documentation', what would make contributing easier is a list of all (or many) of the things (classes, features, genrenal areas whatever) that need docs.

Actually, the main point of my above idea is that you will see what methods are not documented while editing the code.. (with different icon in the left bar).
