Justin wrote on Wed, 08 March 2006 18:53I love to use Virtual Desktop Managers for increased productivity. As of now, the free Microsoft Virtual Desktop Manager is having problems with theIDE. If I switch to a different desktop while running theIDE, the main window does not repaint itself when I return to the Desktop with theIDE in it. I have to close out of the program and reopen it for everything to work properly.

602Beta4
Windows XP SP2

I have downloaded VDM, but have problem to reproduce the bug. Must be more conditions for that to happen that just switching desktop (also, please try with the latest version).
