Or, even better, a page for each function, or class or whatever.
A dialog with fixed fields for input, like this :

Title : xxxxxxxxxxxxxxxxxxxxxxxxx

Description :

xxxxxxxxxxxxxxxxxxxxxxxxxx
xxxxxxxxxxxxxxxxxxxxxxxxxx
xxxxxxxxxxxxxxxxxxxxxxxxxx

Usage :

xxxxxxxxxxxxxxxxxxxxxxxxxx
xxxxxxxxxxxxxxxxxxxxxxxxxx

Parameters :

xxxxxxxxxxxxxxxxxxxxxxxxxx
xxxxxxxxxxxxxxxxxxxxxxxxxx

Result :

xxxxxxxxxxxxxxxxxxxxxxxxxx
xxxxxxxxxxxxxxxxxxxxxxxxxx

Caveats :

xxxxxxxxxxxxxxxxxxxxxxxxxx
xxxxxxxxxxxxxxxxxxxxxxxxxx

Example :

xxxxxxxxxxxxxxxxxxxxxxxxxx
xxxxxxxxxxxxxxxxxxxxxxxxxx

See also :

xxxxxxxxxxxxxxxxxxxxxxxxxx
xxxxxxxxxxxxxxxxxxxxxxxxxx

that's all. Click OK and you have it autoformatted in richedit or whatever you like. A button to insert links would be good also. Quick to enter documentation, not losing time to format it. Of course, a button to get it back into dialog for editing.
BTW, I'd prefer a doc page for one item, too... putting 30-40 items with short description in one page is not enough and time consuming to look for info, IMHO.

Max
