hello forum. This is my first topic (reply in fact) and i just started to use this amazing IDE. UPP y very professional and very cool. But i have a litte noob question. How i insert a new Layout in my project?. I insert a new file called "Options.lay" with the command "Insert package directory file(s)". Then an Layout editor is open but i cannot insert a "frame" to start the addition of widgets... Any suggestions??

thx in advance.

EDIT: one second after end this post i found the solution... i feel stuppind
