Well, a What is "dummy" class for?

It shouldn't change a thing shouldn't it? But anyway, if I removed it, the toggle buttons just didn't appear and I don't know why... I made new separate cpp/h -files for the classes, derived SButtons class from ParentCtrl as you suggested, and now it works fine without it. And please, don't think I've lost my marbles, I retested this couple of times

Why Empty layout?

I bet I once had a good reason for this...

luzr wrote on Sat, 11 March 2006 12:43Well, a What is

The important part is that Rearrange should reset the splitter and add all subpanes again. And both Add and CloseButton should call Rearrange....

I was pondering if I'm going to do this or not, I will if this seems messy in actual context.
