luzr wrote on Mon, 30 June 2008 03:36Well, to avoid this situation in the future, I have moved my "SqlExp documentation examples" package to reference/SqlExp.

This should have two nice purposes:

When you add something new to SqlExp, add example of it to this package. And, by compiling it, there should be a bit of safeguarding against these kinds of bugs...

Mirek
Good idea. I'll try to fix that (In my app there are so many sqls so I thought I hadn't broken anything..)
