Subject: Error: Invalid UTF-8 sequence when reading txt file from hard disk

Hi,
I am having troubles reading a text file from disk.
I created the txt file with windows XP (PT) notpad. Then, in a Upp I use the fopen and fgets to read file lines.
When I add the lines read to a ArrayCtrl I cant see the accents. If I try to display it using the Exclamation message box function it displays "ERROR: Invalid UTF-8 sequence".

Any doc to read about how U++ handles different char sets?

Any help would be appreciated.

Thank you,

Alex
Env:Win XP (PT), U++ 2007.1
