Yes, thats it, win32 API but I dont know how to call a win32 api thats why I asked how to show a win32 MessageBox

Ok, In this afternoon I doenloaded the lastest upp and I already fixed all the bounding modifications I did for the 2007 version. Now all the message boxes work but another problem arrives. It is the SetStyle function on edit boxes, but I will create another thread for this one

Thank you!

Kim
