---

Hello,

this is my first post. I hope it will be in correct site  
I'm now starting with Upp++ but I know about it many time before. I use to develop in database environments and I would like to know if there is any project or idea about including Firebird access in Upp++. If it's not so and I it could be nice and interesting, perhaps it would be a good project.

Thanks for all and what great product is Upp++!

Juan.
