Subject: Re: ubuntu 8.04 problems? Posted by mdelfede on Fri, 11 Jul 2008 18:24:42 GMT View Forum Message <> Reply to Message

Mindtraveller wrote on Fri, 11 July 2008 19:35I wonder why "All static" option is still active? This was discovered about 10 builds ago and is still a problem. Recently I`ve rebuilt TheIDE under FreeBSD from latest SVN sources and got the same wrong option active by default.

Well, I did check the debian package and GCC.bm (which sets default link mode) is ok. Maybe you had an old .upp/theide-svn folder ? It it was already there, the installer don't replaces it, in order to keep user options.

Max

EDIT : BTW, installing directly from svn sources doesn't set the default GCC.bm as debian package... I guess there's something in installer to adjust.
