Hey guys!

I got U++ working on Debian Lenny! I had to use libstdc++6-dev from Debian Etch repos.

Anyone trying to get U++ working on Debian Lenny should try this! Anyway, I hope this little problem will be solved soon since Lenny is to be released this year to become the new debian stable.

Thanks for this nice tool called Ultimate++!

BTW... I started creating an application for storing data for my sister's medical clinic. Ultimate++ here helps creating a professional and easy to use GUI.
If everything goes well and she likes I'll post more comments here.
