Mindtraveller wrote on Mon, 14 July 2008 19:17TheIDE 806.r125 built from new revision 315 sources: the same old problem with big system fonts. It was solved some builds ago and TheIDE shown normal system fonts, but it looks like it appeared again.  
Platform: KDE 3.5.8, XFree86, FreeBSD 6.3

Please check.

CtrlLib/ChGtk.cpp line 615 should be:

```
String font_name = GtkStyleString("gtk-font-name");
```

Do you have String there?

Mirek
