dmcgeoch wrote on Mon, 21 July 2008 13:31I recently obtained access to a ia86 Solaris 10 system and was trying to find out the state of the Solaris port. There seems to be mention here and there, but no actual information. If someone could let me know what the basic requirements are, I would be happy to report my results on that platform. Thanks for your assistance.

Dave

Well, if there is libxft, there should be little problem.
