Please, could you check whether this:

```
#if defined(COMPILER_MSC) || defined(COMPILER_GCC) && (__GNUC__ < 4 ||
__GNUC_MINOR__ < 1)
#define NTL_MOVEABLE(T) inline void AssertMoveable0(T *) {}
#else
#define NTL_MOVEABLE(T) template<> inline void AssertMoveable<T>(T *) {}
#endif
```

fixes U++ to compile with 4.1? (Just to test whether the macro condition is right...)

Mirek
