cbpporter wrote on Tue, 22 July 2008 10:13...when the application does not quit immediately, like when running a server.

But TheIDE also hangs when debugging something as simple as:

```
#include "stdio.h"
```

```
int main(int argc, const char *argv[])
{
    printf("%s\n", "caca");
    getchar();
    return 0;
}
```

They do not hang. They just do not open a console.

Sorry, I have not figured how to fix that yet. Not that simple...
