michael wrote on Mon, 28 July 2008 07:02I got the following error after updating to 2008.1:

```
c:\upp\uppsrc\richtext\txtop.cpp(54) : fatal error C1001: An internal error has occurred in the compiler.  
(compiler file 'f:\dd\vctools\compiler\utc\src\p2\main.c[0x51144100:0x0000002C]', line 182)  
To work around this problem, try simplifying or changing the program near the locations listed above.  
Please choose the Technical Support command on the Visual C++  
Help menu, or open the Technical Support help file for more information  
Internal Compiler Error in C:\Programme\Microsoft Visual Studio 9.0\vc\Bin\cl.exe. You will be  
prompted to send an error report to Microsoft later.
```

Again the old Hydra-Problem?

Nope. Again the BLITZ in optimal mode.

BTW, have you activated BLITZ for optimal or is this the preset setting?
