Blitz IS disabled for Release-Mode.

And in Debug-Mode i got this one:

Linking...

mysqlclient.lib(my_winthread.obj) : error LNK2001: unresolved external symbol __db_doprint_

mysqlclient.lib(mf_loadpath.obj) : error LNK2001: unresolved external symbol __db_doprint_

mysqlclient.lib(my_getwd.obj) : error LNK2001: unresolved external symbol __db_doprint_

mysqlclient.lib(my_once.obj) : error LNK2001: unresolved external symbol __db_doprint_

and so on...

I confused... every time i update to a new UPP-Version there are some compiler-, linker-, or path-problems.
