unodgs wrote on Tue, 14 March 2006 12:03#include <CtrlLib/CtrlLib.h>

```
struct Item
{
    int i;
    int j;
    Size GetSize() { return Size(i, j); }
};

int main()
{
    Item item;
    item. // WORKS, but popup window isn't large enough to show GetSize() text..
    Size isz = item. // << DOSN'T WORK
}
```

Popup window size reproduced, second bug not -> well, of course it does not work as you present it, as

item.Size isz = item.

is invalid code...
